

As a reseller of AT&T wireless we offer the below listed GSM handsets that have been tested and rated by AT&T for Hearing Aid Compatibility (HAC)

Rating System		Works Well	Works Best
M-Rating	"Hearing Aid Immunity" These phones are less likely to generate interference with hearing devices.	M3	T3
T-Rating	"Compatibility with Hearing Aids with Telecoils" These phones are more likely to work with the hearing devices that have Telecoils.	M4	T4

Functionality	
Low	A product that scores in this range is functional but unremarkable, containing only basic functions, such as calendar, alarm clock, call logs, etc. It is the least expensive.
Mid	A product that scores in this range is very functional and carries different features such as a speakerphone, MP3 player, camera, etc. It's cost is average
High	A product that scores in this range is very functional and quite remarkable. It carries features such as a camera, voice dialing, video, MP3 player, speakerphone, etc. It is typically more expensive.
